

INNOVATIVE
TECHNICAL
FOR WOOD INDUSTRIES

INNOVATIVE TECHNICAL COMPANY PROFILE

OVERVIEW

Innovative Technical Company is a specialized company for modern wood industries. Founded in 2019 to meet the growing demand of high-quality surfaces to work in the region. Today, a major player shaping the work of material furniture, and we strive to meet the needs of our customers, and beyond by providing the highest industry standards and commitment to continuous development with ambitious, committed members of the highly skilled, and the leaders in the expansion of its operations and cost most of the projects in various sectors in the Middle East region successfully. Although our products range is well known, we continue to develop new products to meet the market demand of new facilities of new facilities and technologies.

QUALITY

We benchmark our quality into the highest international standards to ensure that our clients receive world class quality products. We uniquely understand our clients' needs and utilize the world's finest raw materials, accessories, and fittings to produce exceptional solutions. Since meeting all requirements as an industrial company.

RESEARCH AND DEVELOPMENT:

We constantly innovate systems and processes by our association expertise and years of experience in the field of new scientific discoveries and technical trends in the industry and work surfaces. We pay attention to every single detail and provide solutions that meet our customers' needs and budget.

SAFETY

We test all our products to ensure that they meet international standards for safety and quality. Our commitment to safety is reflected in our choice of high-grade materials and carefully planned procedures, ensuring that our product users are always working within the safety possible environment.

DESIGN AND ENGINEERING:

Abiding by international guidelines and regulations, specialized engineers and design team work seamlessly to deliver integrated consulting services including project planning, layout design, 3D drawings, specifications, and estimated budget. Through our multitude of configurations options, we offer our client the option to customize their furniture solutions according to their precise needs, with limitless configurations. Our design team provides predictive state of the art CAD drawings and product details, so that our clients can visualize the design before it is installed. Our team provides clients with optimal and cost-effective furniture solutions while preserving functionality, durability, and quality.

MANUFACTURING:

Using high quality and innovative raw materials, our technicians use the most advanced machinery including CNC operated machines to manufacture best quality products for our clients. We utilize cutting edge automated methods in manufacturing specialized furniture systems. We strictly adhere quality management standards in the manufacturing processes starting from planning and scheduling throughout manufacturing and till delivery of final product.

PROJECT MANAGEMENT AND INSTALLATION:

Throughout all projects phases, our projects team works closely with our clients and contractors to ensure overall project feasibility and success. Whether your project is located in Jordan, the MENA region, or any other part of the world, our in-house projects team ensures optimal coordination and installation of each project. This dedicated team saves our clients' projects installation time and ensures smoother project site coordination. In accordance with Innovative Technical company policies, we observe the highest safety measures during installation without interrupting other works taking place at the project site.

AFTER SALES SERVICES:

our dedication to our clients doesn't end at delivery. As our key aim is to build long-term relationships with our clients, we focus our entire experience on serving a trusted business partnership from initial consultation to post installation. Due to the high quality of products and proper installation, our furniture systems barely need maintenance. However, our local service team is always ready to ensure proper performance of our installations as well as conducting preventive maintenance programs.

OUR MISSION:

Develop, design, manufacture and install specialized furniture to fulfill customers' unique needs and striving to exceed their expectations.

OUR VISION:

To become one of the most successful and respected manufacturers of specialized furniture in the world.

OUR VALUES:

Leadership: the courage to create the best solutions

Collaboration: leverage collective genius

Reliability: long lasting solutions and partnerships

Passion: committed in heart and mind

Diversity: as inclusive as our brands

Quality: what we do, we do well

Safety: our priority all the way

Green: environment protection is our responsibility

PRODUCTS:

We are specialized in acrylic solid surface materials, lab furniture, dental laboratories, toilet partitions, offices and banks furniture, and lockers. The combination of the high technology and high design in these materials can turn any remodeling project into a fully functional work of art. Acrylic decorative materials with endless commercial uses, these surfaces also make the perfect countertop for home makeover or construction project they are incredibly versatile products.

FEATURES AND BENEFITS:

- Wide variety of colors
- Flexible
- Hardness
- Excellent quality
- Can be used in different applications (hospitals, schools, public sectors, villas, etc.)
- Competitive prices
- Hygienic
- Doesn't stain

USAGE AREAS:

- Hotels
- swimming pools
- restaurants
- Recreational parks/centers
- Health and sports clubs
- public restrooms
- Malls and office buildings
- Schools, colleges, and universities

USAGE AREAS:

- Flexibility of design and space saving
- Chemical and Graffiti resistant
- Colorfast and durable
- Cigarette burns resistant
- Water resistant / Hygienic
- Wear, impact, and scratch resistant
- Wide choice of colors

ACRYLIC SOLID SURFACES:

Acrylic solid surfaces are among the greatest counters. They give any area a clean, contemporary, and streamlined look. Acrylic is an excellent choice for both home and commercial areas since it is long-lasting, easy to maintain, and reasonably priced. It can be readily cut, routed, and sanded like wood and formed into countertops, shower walls, external cladding for buildings, signage and furniture where non-porosity and infrequent maintenance are highly valued. These are just a few of the many applications.

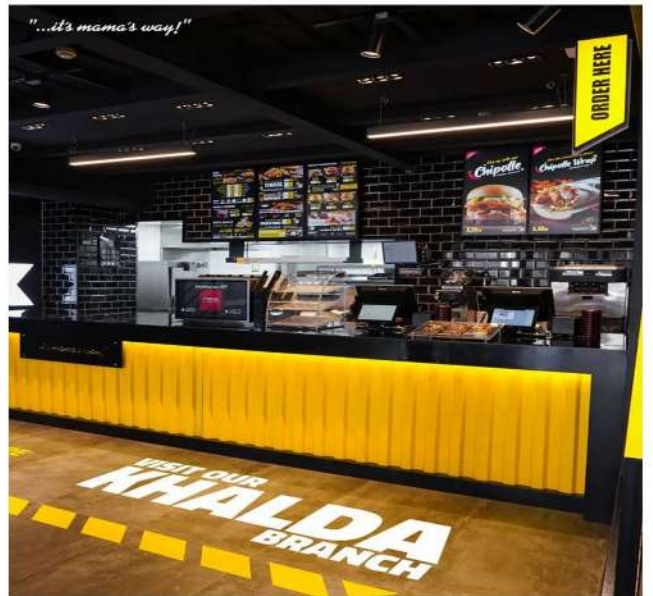

In addition to being workable like hard wood, it can be heated and thermoformed into curved and molded shapes. It can also be printed on using dye-sublimation techniques that deposit the ink just below the surface, so the image becomes permanent. Our acrylic solid surfaces are made in Korea especially from (Hanex Solid Surface) one of the best manufacturers company for solid surfaces

ACRYLIC SOLID SURFACES:

Innovative technical will fulfill all your design dreams with unique designs and a timeless color pallet. Achieve your goals while still choosing a high-quality product that can withstand anything your life throws at it. You may relax knowing that you've chosen a surface that will last a lifetime!

LABORATORY FURNITURE:

Laboratory Furniture is essential for the organization of any laboratory or industrial facility. To ensure that optimum work efficiency is achieved, lab furniture should be designed to accommodate laboratory personnel and equipment. Lab furniture can be constructed from a range of materials including (benchtops, casework, shelving, storage units and work benches).

In addition to being well-designed and robust these items should also be carefully selected to suit the budget of the customer. Laboratory furniture is a diverse category. The primary considerations in laboratory furniture design are safety and ease of access to all equipment with limited clutter.

LABORATORY FURNITURE:

Lab furniture can be divided into several distinct categories:

Work benches are perhaps the most important and commonly used pieces of laboratory furniture. They are usually large and heavy items and therefore they must be carefully selected to suit the specific purpose to which they will be put. These largely come in two categories: bench tops and bench trolleys.

Lab bench tops are heavy-duty work surfaces that are generally fixed to solid walls for stability and remain stationary as an individual works at them.

TOILET PARTITIONS:

Toilet partitions give you the ability to divide a toilet in half so that someone using the facility can relieve themselves without someone else sharing their restroom. Not only does division of a toilet create privacy for each user, preventing awkward conversations and embarrassing moments, it often allows for more than one person to use at a time. Therefore, bathroom partition systems are such an effective design feature for restrooms.

Toilet partitions from us are manufactured in Spain by FINSA company which it can be as simple as a wall or door, or as complex as a slide, folding screen, or combination of both. A partition that simply is installed on the floor of the restroom is referred to as a "floor plate". It consists of a solid piece of hard board that is anchored to the floor and covered with foil-backed carpeting, matted vinyl sheeting or other non-absorbent material. The slides and screens shown in the following images are all floor plates. The sliding doors are generally used for small residential locations where privacy is not an issue and/or when it is easier to maintain them.

There are two basic types of toilet partitions: sliding and folding.
